SUMMARY

Senior full-stack engineer with **nearly six years at MathWorks**, delivering internal applications and developer tools used by hundreds of engineers. Experienced in leading projects from user research through frontend and backend development to production rollout, using **React, Next.js, TypeScript, Node.js, and Go**. Combines full-stack engineering with product design and production operations.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Responsive Interfaces
Backend Architecture and API Design: Node.js, Golang, Python (FastAPI), RESTful APIs
Databases: PostgreSQL, Supabase, MySQL, SQLite, Redis
Infrastructure & Tools: Docker, Linux, Nginx, GitHub Actions, GitLab CI, Grafana/observability, Claude Code, Claude Design, Figma MCP
Product Design: UI/UX, User Studies, Design Systems, Figma, Variant, Framer

EXPERIENCE

MathWorks | Bangalore, India — Jun 2020 – Feb 2026

Senior Software Engineer – Developer Platform Team — Mar 2025 – Feb 2026

- Led development of a new reporting dashboard from user research and design through pilot testing and rollout, transitioning approximately **1,000 users** to the new portal.
- Developed full-stack internal applications using **TypeScript + Next.js** and utilising MathWorks' internal **design system**. Also created **RESTful APIs**, and **OAuth + SSO** integrations; incorporated user feedback to make reports easier to navigate and data easier to explore.
- Optimized **React** frontend performance using **TanStack Query** for server-state caching and request deduplication, **virtualization** to render only visible rows in large lists, **pagination** to limit data fetched per request, and **lazy loading** to defer loading non-critical components.
- Built **Go** data-ingestion tools that sent parsed data through **Next.js APIs** to **PostgreSQL**, using **Drizzle ORM** for database access.
- Managed **Linux** based server infrastructure: containerized services with **Docker**, configured **Nginx and SSL**, **CI/CD** with **GitHub Actions**, and supported monitoring with **Grafana**.
- Facilitated **monthly user-community meetings** to gather feedback, brainstorm ideas, and identify improvement opportunities. Presented new features and encouraged users and teammates to showcase solutions and share knowledge.

Software Engineer – Developer Platform Team — Jun 2020 – Mar 2025

- Modernized undocumented test-execution and log-parsing tools, replacing legacy **Perl** code with **Go** after evaluating Go and Python. Built a command-line wrapper, piloted the tools, and rolled them out to approximately **500 developers**; automated previously manual SSH releases with **GitHub Actions**.
- Replaced legacy function-based exploratory tests by designing and implementing a new **MATLAB Test Framework** for **object-oriented exploratory testing**, with automated test-runner selection based on operating system and hardware requirements, including GPU and Arduino availability.
- Developed and maintained **full-stack features** across legacy applications, strengthening application security by migrating services to **HTTPS** and enabling **OAuth-based authentication** workflows.
- **Mentored interns and new hires** through technical onboarding, codebase walkthroughs, and hands-on guidance, helping them become productive team contributors.

CAREER BREAK & PERSONAL PROJECTS

Taking a career break and moved to the Netherlands in 2026. I am building personal projects and exploring **product design**. Using **Claude Code, Claude Design, Variant, Figma, and Framer** to prototype **responsive interfaces**, with a focus on **visual hierarchy, typography, colour systems, design systems, and interaction design**. Exploring AI-native interfaces and workflows that translate designs into code, including **Figma MCP**, and attending design and technology conferences. You can find my projects on my Github profile: https://github.com/saumya13.

EDUCATION

MTech, Computer Science | IIIT-Delhi — 2018 – 2020 | GPA: 8.5/10
BTech, Computer Science | UIET, Maharshi Dayanand University — 2014 – 2018 | GPA: 8.3/10
